ACCREDITATION DETAILS

LEARNING OBJECTIVES

Identify epidemiology trends and incidence rates of cutaneous lymphomas around the world, as well as recognize the new varieties included in the WHO-EORTC classification with specific geographical peculiarities.

Distinguish the different molecular events being investigated regarding the pathogenesis of cutaneous lymphomas and assess the potential role of such molecules as future therapy targets.

Utilize novel treatment strategies such as combination topical and systemic approaches as appropriate for patients who are diagnosed with distinct subtypes of cutaneous lymphomas.

Identify the most promising molecular pathways to develop new agents for therapy and drug delivery for patients with cutaneous lymphomas.

Evaluate and recommend multidisciplinary treatment plans based on both effectiveness and appropriateness for patients with cutaneous lymphomas.

Analyze results from key U.S. and international cooperative group trials attempting to define standard of care treatments for patients with cutaneous lymphomas.

TARGET AUDIENCE

Dermatologists, hematologists/oncologists, pathologists, radiation oncologists, psychologists, epidemiologists, immunologists and basic scientists.

ACCREDITATION STATEMENT

Northwestern University Feinberg School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

CREDIT DESIGNATION STATEMENT

Northwestern University Feinberg School of Medicine designates this educational activity for a maximum of 27.5 AMA PRA Category 1 Credit(s)[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

FACULTY DISCLOSURE

Northwestern University Feinberg School of Medicine requires course directors, speakers, instructors, planners and other individuals who are in a position to control the content of this activity to disclose any real or apparent conflict of interest they may have as related to the content of this activity. All identified conflicts of interest are thoroughly vetted for fair balance, scientific objectivity of studies mentioned in the materials or used as the basis for content, and appropriateness of patient care recommendations. The faculty disclosures and the discussion off-label usage will be indicated in the course syllabus.
